Line City Coming Up as a Gold Producer.

In the Duck Creek District—Alberta Land and Stock Company Incorporated—A New District Discovered—With a Showing of Good Gold Ore—Meeting of the Overland Directors—The Golden Eagle—Irving Returns From Blackfoot—Shipments of Buckeye Ore—Yesterday's Quotations—Bank Clearings—Mining Notes and Personalities.

In their endeavors to corral the wealth of the world, the Rothschilds do not stop when they have taken the pick and the choice of the gold producers throughout the country. No, not by any means, for they also seek great possibilities in copper mining, and in silver mines that carry a good percentage in the yellow metal.

Of all the people on the face of the earth, the English are the most keen for promising mining propositions, and their attention now is being largely directed to America for this line of investments, and throughout the west there is hardly a mining camp of prominence that is escaping their strictest scrutiny.

Headed by the Rothschilds, English capitalists and English syndicates are now sending their agents and experts into nearly every district in this country, and every property of more than ordinary promise is being grabbed up by them—they go like hot cakes; and these people are welcomed, for we have the mines, and they have the stuff, and the proper money to build up any camp and any district, and this is what we all want.

The Rothschilds have been operating extensively in the United States during the past few months. They have just purchased one of the largest copper mines in the west, at Butte, Montana; they have been negotiating late for a large tract of land in the Blackfoot district in Idaho, and now, The Herald is informed, they have cast long eyes on one of the richest gold and silver mines to be found in this country.

This property, it is said, is the noted Mammoth mine, in Tintic, a property that has produced its millions, and that now, with its immense ore bodies exposed, with its splendid new mill and water system in better shape today than ever before.

According to The Herald's informant, Henry Bratner, the noted Montana mining expert, will leave today for Mammoth where he will be joined by Hon. P. T. Farnsworth, and together these two gentlemen will make a superficial examination of the great Mammoth mine, and if it comes up to expectations, Mr. Bratner will call in his assistants, and the property will then be examined and sampled in a most thorough manner.

It is understood that the Mammoth management was loth to allow an examination of the mine to be made, as it was well-satisfied with the present and future outlook for the property, and it also claimed that ever if the examination of the property proves satisfactory to the Rothschilds representatives, that there is no assurance that a sale will be made, and that they will buy it, indeed, it is said that the agent of the Rothschilds were staggered at the price named, and that for a time they hesitated as to whether or not they should persist in their efforts to buy the mine, as to make an examination of this great bonanza.

Whatever may be the result of these negotiations, the Mammoth mine will be the winner, for nothing unless it be a handsome price asked for the mine, will deter our English cousins from adding this great property to their string of bonanza producers in this country.

DUCK CREEK DISTRICT.

Judge Barber's Opinion on This Rich Mineral Country.

With the revival of the Duck Creek railroad project, renewed interest is being manifested in the great and unexplored resources of this country and in the regions immediately west of Deep Creek, in White Pine county, Nev.

In Duck Creek mining district, in this county, the silver-lead ore deposits are simply marvelous in their extent and value; and not only are lead veins to be found there, but in near-by localities there are mines of dry ore, such as gold and silver in quartz, both free milling and silicious, which, with the lead ore for a flux, could be treated at a profit with a smelter in the camp.

The late Judge W. T. Barber, who was an authority on mining matters, and who carefully examined the Duck Creek country one time, made a report on the same, as follows:

Having spent a part of two seasons prospecting and investigating the mineral belt of this Duck Creek mining district, White Pine county, Nev., I am quite familiar with the same.

There are three characters of ore in the district. The first is a high grade ore, carrying from 25 to 100 ounces silver, a copper stannite chloride-bromide ore carrying more or less stannite, or, as it is now called, black metal; this is a high grade ore, carrying from 10 to 25 ounces silver. The most important ore in the belt is the lead-silver galena—carrying from 5 to 10 ounces silver and from 75 to 81 per cent lead.

There is good money to be made in mining stocks by careful investment. Daily listed stocks have sold \$20.12.20 in regular daily trading. Weekly market letter and quotations now available.

W. C. WOOLLEY, 130 Main street, Salt Lake City.

E. G. WOOLLEY, Jr., Member Stock Exchange.

This ore seems to be a free lead ore, free from antimony, zinc or other base metals. The country rock or formation is lime of different species. The ore occurs in the chimneys, breaking through the surface.

The Bonanza, Buller Rock, Big Injun, Wenderland and Overland are prominent mines with heavy outcrops of lead and with splendid surrounding conditions for developing into heavy producing properties.

Some 1,000 or 1,500 feet east of the Bonanza is a line of claims, eight in number, which seem to be on the same vein. The ore occurs in large chimneys at intervals of from 50 to 3,000 feet. At the extreme north end of the lead belt is the Pickaboo, which adjoins the chloride belt, going south there are three claims; then comes the Lizzie, and then the Lizzie, all of which have heavy ore chimneys coming to the surface with excellent conditions for making good mines. There are other mines and lead-bearing rocks for developing into producing mines.

There are all the necessary facilities for reducing the ore in the immediate vicinity—water and an abundance of pinion pine, which makes the best of charcoal. Farm products are abundant near the mines. The surrounding district can furnish high-grade ore, both dry and lead-bearing, which, mixed with the lead ores of this district, would make a good grade of bullion. In my opinion this would be an excellent place for a smelter plant.

A SLUGGISH MARKET.

A Few Sales Save the Exchange From a Whitewash.

There was but very little activity in the pit of the stock exchange yesterday, and but for a little trading in a couple of the unlisted stocks, the call would have been characterized by a complete whitewash.

Mammoth was strong in the bidding, but buyers and sellers could not get together. At the close this stock stood at \$3.38 and \$3.35 asked.

Swansea suffered from a bear attack and broke heavily. This decline was predicted in yesterday's Herald; but it was not believed that it would decline so heavily, but sales were made at \$2.19 and \$2.20. The buyers are undoubtedly safe, however, as the stock will surely regain its lost position within a month or so.

Richmond and Anaconda made sales at 24 cents; while Dalton stiffened up a little and made some gains in the bidding.

On account of the hot weather and the sluggish market it has been suggested that the exchange take a vacation until the middle of September, and that the necessary action will be taken on the suggestion at an early day.

The transactions of the day were as follows:

SALES OF STOCK.

200 Swansea at \$2.19.

100 Swansea at \$2.20.

1,000 Richmond and Anaconda at 24 cents.

Total sales, 1,300 shares.

RICH GOLD ORE.

Line City to the Front as a Producer of the Yellow Metal.

LINE CITY, Iron County, Utah, June 14.—As time progresses it is daily becoming more and more evident that the new Line district is destined to develop into a great producer of the precious metals, and not only silver, for the white metal was the first to be discovered here, but also gold, and the camp can now take up the popular cry of "16 to 1," for the district is now on a firm bimetallic foundation, as here we have both gold and silver galena.

In the early history of the Line district the discoveries of rich silver ore caused great excitement throughout the south. So far as developed these silver deposits have proven to be permanent and the ore bodies increase in size and value with depth. Already two or three shipments of high grade ore, running well with gold, have been made, and other shipments will soon be in the order of the day.

The excitement incident to the finding of rich silver ore had hardly subsided, however, before the camp was all agog over the big gold discoveries, and now attention is being largely directed from silver prospecting to searching for the yellow metal.

The Creole mine, one of the best of the gold discoveries, is owned by W. J. McBurney, J. H. McDonald and others, of Cedar City. The Creole is a true fissure, the vein being about three feet wide between walls, and the ore runs in place, and is acknowledged by the mine to be the largest and richest gold property in the camp. Its owners will make a car load shipment of ore to Salt Lake some time next week.

Mr. McBurney has built a store building in Line City and will soon move his stock of tinware and hardware from Cedar City to this place, believing which he will put in a stock of general merchandise.

Work is being vigorously pushed in all of the leading properties in the district, and people are flocking in here to the order of the day.

Now regarding the future of the Line district. Everything here is push and activity, and the camp is bound to come to the front as one of the great silver and gold producers in Utah.

What we need now, however, is a custom mill, and the man that puts one in will make no mistake; and he need never remain idle for lack of

Most people

do not know that almost all Japan tea is colored. How can they know? Who will tell them?

Certainly not those who have it to sell.

Don't you care to know?

You will learn something you did not know before.

A Schilling & Company San Francisco

ore. In the district there is plenty of water, any amount of wood, and an abundance of gold and silver ores, and what more could a miner desire, for unless it was for the eagles already coined?

A ten-stamp mill here would prove a paying enterprise.

The Ophir and Utah Spur mines, both rich silver producers, are looking well, and their owners are much pleased over the outlook.

Line City, our new town, is growing substantially, and some neat structures are going up here or are in contemplation.

To get to Line City take the Union Pacific as far as Milford, from Milford daily stages run as far south as Pioche. By taking one of these the traveler can be set down at Desert Springs, which is an oasis on a desert, from which the distance to the Line district is but a few miles distant.

INCORPORATED.

The Alberta Land and Stock Company File Articles.

The Alberta Land and Stock company filed articles of incorporation with the county clerk yesterday. The capital stock is \$10,000, and the incorporators are: Samuel W. Wooley and H. M. Brown, Salt Lake; W. J. Robinson, Grantsville; Charles Amey, Pocatello; W. A. Larsen and M. P. Madson, Ephraim; H. C. Bonner, Salt Lake, and H. R. Sloan, Mantle. The stock is represented in a contract with the Alberta Railway and Coal company for the transportation of 15,435 acres of land in the Northwest territory, Canada, and which will be used for stock raising purposes. The officers of the company are: Mr. W. Wooley, vice president; W. J. Robinson, secretary and treasurer; Charles McCarty and W. A. Larsen.

THE NEW DORSEY DISTRICT.

Grab-Staked Prospectors Find New and Promising Gold Fields.

Hon. George W. E. Dorsey, always active, pushing and enterprising, has cast his bread upon the waters figuratively speaking, and has found a gold mine in the shape of promising gold fields.

Two months ago Mr. Dorsey grubstaked two prospectors and sent them out into the country west of Merced and Tintic, and from recent reports it looks as if they had struck a bonanza, and a gold one at that.

From all accounts the prospectors have been thoroughly examining the country west of Tintic and east of Daguerre, and in this unorganized district they have found a large body of quartzite that promises to develop into a rich producer of the yellow metal. The ore is a free-milling quartz, the vein being eight feet wide, from two feet to thirty inches in thickness, and at a depth of only eight feet, carries gold values of \$15 to the ton.

An encouraging outlook for the new find that Mr. Dorsey has already let a contract for the driving of a 50-foot tunnel on the ledge, and for every foot that the tunnel is driven a depth of two feet will be gained.

Mr. Dorsey's men have made eighteen locations on the newly discovered mineral belt, and it is his intention to thoroughly develop the group.

The country which the discovery was made is very rugged, but it abounds in timber and water; and, what is also in its favor, it is only about three miles distant from the proposed route of the Deep Creek railroad. Mr. Dorsey will go out soon to take a look at the new camp, and the railroad officials who leave Mammoth today for the purpose of inspecting the Deep Creek country will examine the same on their way out.

When the district is organized, which will soon be done, The Herald would suggest that it be called "Dorsey mining district."

Ore and Bullion.

The ore and bullion receipts yesterday were as follows:

Bonanza—Ores, \$10,034.

Commercial National Bank—Ores, \$3,000.

McCormick & Co.—Bullion, \$3,450; ores, \$3,200; cyanides, \$8,590.

J. Jones & Co.—Ores, \$16,600; ores, \$14,100.

Wells, Fargo & Co.—Bullion, \$3,431.

Silver and Lead.

Bar silver was quoted yesterday at 65 1/2 cents; lead, \$2.50; casting copper, 10 1/2 cents.

Bank Clearings.

The clearings of the associated banks yesterday were \$311,327. For the same day last year they were \$167,632.

Mining Notes and Personalities.

The Galena Mining company received a car of ore yesterday.

H. D. Bastian of the Electric mine, who is in the city, states that the property is in a most promising condition.

Hon. E. J. Radtetz and Hans Peterson, leading citizens of Stockton, who are in the city, state that two or three big mining deals are "on tap" in that locality.

W. E. Jernisse, president of the Bingham Copper company, was in the city yesterday for the first time in three weeks, during which time he has been confined to his home by a severe illness.

W. H. Irvine, who is back from his trip to Blackfoot, Idaho, informs The Herald that the Acme Flour Gold Amalgamators, now in operation on the gold belt of Idaho, are doing splendid work, and are doing splendid work.

Brother B. Sprenger, accompanied by his wife, will leave for New York this morning, from which place, on the 23rd, he will ship on the steamer Trade for Germany. Mr. Sprenger expects to return home about September 1st.

It has been ascertained that the interior department has accepted of patent surveys and plots for claims made in the old Crittenden military reservation in Camp Floyd mining district. This being the case, it would seem that locations made there prior to April 9, 1895, were legal and valid.

Two carloads of ore from the Buckeye mine near Salt Lake City, Tintic, are expected in today. The Buckeye is making a fine record and is paying for development work being done out of the pocket.

It is the opinion of the district among well-informed mining men that in time this property will open up into another Bullion-Beck, Centennial-Eureka or Mammoth.

C. H. Wilbur, who is just in from Central district, Nevada, states that

Baseball Players Getting Ready For the Fray.

FORT DOUGLAS NOTES.

The new rear sights for the magazine rifle, caliber .24, are expected to arrive this week. They are set for a smaller degree of drift than those used at present. A thorough test will be given them during the remainder of the season's practice, and no doubt they will prove to be more satisfactory than the old ones, about which much has been said.

When you want anything keep up the howl until it arrives.

Firing at the 600-yard range will be completed by tomorrow or Friday, when the shooters who have succeeded in making the required 50 per cent at the four short ranges, 200, 300, 500 and 600 yards, will be permitted to shoot the long range and begin operations upon the rectangular enemy, distant 800 yards.

But few of the officers are making good scores thus far during the season's practice as compared to those of former years. Captain Morrison fires regularly a few shots each day, but fails to bring the white disk to the surface, but none of the younger officers have been heard from with a high score.

The change from the back to the prone position at 600 yards has caused a perceptible falling off in the totals at that range, as expected. "Peas" and "beans" are being shot, and the resting the gun on a log, but it has been decided to be impracticable in war. You could not always see the enemy's position, and the longer time to lie down and get ready to fire than from the prone position, and then it was an unusual way of shooting, as shown by the positions taken by nearly all soldiers in battle. When under an enemy's fire and lying down to shoot they invariably hide the vitals.

Lieutenant Colonel Coates returned yesterday from Chicago and the east, and will resume command of the First battalion. He did not bring back any definite news about the much-talked-of reorganization of the army, but a good sign that there will not be any. Probably the surprise the secretary of war is said to have had in store for our army is that the reorganization will not be a single regiment moved after all the newspaper talk about it.

A number of wheelmen in the post are training for the coming races.

The fifty yard dash between Douglas of Company E and Rowe has been declared off.

Private Thomas Shipp, of Company D, has deserted.

The weather appears to be too warm for the half mile runs recently talked of.

Private Buckley, of company D was discharged on the 14th and Corporal Matthew Kelly, of the same company, will be discharged today.

Westlight Alcorn has gone to Omaha on a two week's visit.

One of the young bear cubs escaped from the garden the other night where he had been taken and chained to keep him from the angry jaws of his big brother. There were evidences of a scuffle in the vicinity and a gunny sock was found near the iron stake.

Some one who tried to sack the cub, there was a fight, and she escaped. To join the circus. The male cub is located in a board pen in the rear of company H, and the way in which he viewed the ball game Sunday afternoon was suggestive of a player in the football team knocked a three-bagger and there was a great hurrah below the hill. His little bearship was busily engaged at a table in pecking grubulations in a half pint of water sunk on a level with the ground. He heard the noise and listened intently a moment and then jumped out and climbed the wall of the top board, and he was on a level with the ground. He heard the noise and listened intently a moment and then jumped out and climbed the wall of the top board, and he was on a level with the ground.

All along the lines of the two roads the employees are taking a lively interest, and as many as can get away will be in attendance to root for their favorites. Agent Peebles of the Union Pacific, who is one of the most enthusiastic and was so afraid of missing the game that he wired in yesterday to know when it is to be called.

It is said that Captain Barnes of the Union Pacific, who is one of the most enthusiastic and was so afraid of missing the game that he wired in yesterday to know when it is to be called.

The contest for the honor of the county ended yesterday, and resulted in an overwhelming majority of votes in favor of Miss Bowen.

Excitement was at fever heat during the morning hours, and the partisan and supporters of the three contestants were going about marshaling all the strength possible for the final onslaught. When the committee finished the count in the afternoon the following result of the election was announced: Miss Sarah Bowen, 2,360; Miss Nora Ellison, 2,340; Miss Hazle Thatcher, 1,365. Miss Bowen is strikingly beautiful, of the pronounced brunette type, and will win the city county credit from which she was chosen as representative of their beauty and grace.

LOUISIANA DEMOCRATS. BATON ROUGE, La. June 16.—The Democratic state convention here last night adopted a platform including the following:

"Resolved, we are in favor of the soundest and best money the ingenuity of man can invent and that experience has demonstrated that this money consists of both gold and silver with equal tender power on a basis of 16 ounces of silver to 1 of gold."
